

After any renovation or construction work, a thorough clean is essential to remove dust, debris, and leftover materials. Our After Builders Cleaning Checklist ensures your property is meticulously cleaned and restored to a pristine condition. This detailed guide covers every area affected by building work, ensuring your space is spotless, safe, and ready to use.

- Remove all debris and dispose of it properly.
- Clean all surfaces, including walls, floors, and ceilings, to remove any dust or debris.
- Clean windows and mirrors to remove any smudges or marks.
- Clean light fixtures and replace any burnt-out bulbs.
- Clean and disinfect all bathrooms, including toilets, sinks, and showers.
- Clean and disinfect the kitchen, including all appliances, countertops, and cabinets.
- Vacuum or sweep all floors and carpets, and mop hard floors.
- Clean any furniture or fixtures that were installed or moved during the construction process.
- Inspect the area to ensure that all cleaning has been completed to a high standard.
- Dispose of any hazardous materials, such as paint or chemicals, in accordance with local regulations.
